

Quemador with tubas KLIMOSZ PPP

15kW 25kW 35kW

pellet

small grade
biomasa

✓ Automatic Cleaning by moving tongue and by air flow.

Two Step Automatic Cleaning: 1 step - strong air blow before fire starts and after burning process end to make burner always clean. 2 step - mechanical movement moves all time cast-iron tongue to avoid sticking biomasa/pellet to the burner tongue.

✓ Automatic Ignition and Automatic Estinguish, Automatic Working.

Klimosz PPP works only when it needs to. When temperature is enough in heating boiler it stops to work to lower fuel consumption. It automatically starts the fire when the temperature is too low.

✓ Durable and solid cast-iron construction. Unbreakable lighter.

Klimosz PPP have cast-iron burner tongue to resist very high temperatures during burning. Lighter we mounted is our third upgraded version after many years experience, to be as durable as it is possible. We do not use ceramic lighters which are very sensible, and not durable for many lighting cycles.

✓ Fotocellular as standard included.

Fotocellular is used for better controll burning process - it means higher efficiency, less ash/dust and less fuel consumption.

✓ Posibility to buy complet with regulador Klimosz Komfort RT-16 and silo 310L, 900L or 1700L

We offer fully compatible and tested set, You can choose capacity of silo, and everything just perfect works.

We offer quemadores with adapter - quemador is compatible with:

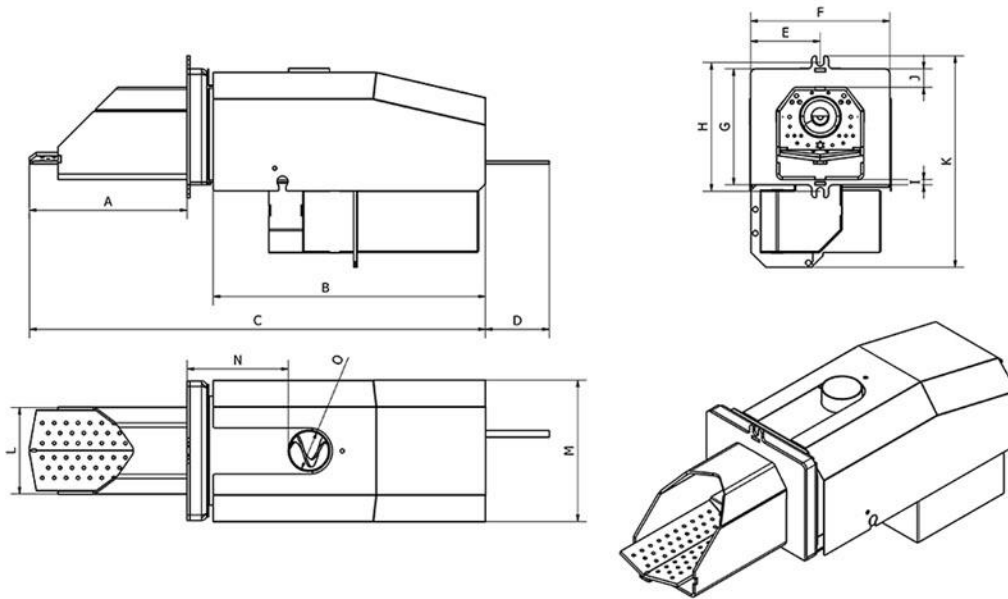

- Klimosz Wally, Viadrus U22, LING Duo/Bio with standard adapter
- every other heating boiler we offer adapters on request

Quemador contains:

- quemador with fotocellular
- elastic tuba 1m lenght
- metal tuba with feeder 1.5m lenght
- spare lighter just in case
